Bioinformatics Course

Karolinska Institutet – RIKEN

Joint International Doctoral Course 2023

**Bioinformatics Analysis and Visualization
of Medical Genomics Data**

Course Details &
Registrations Here

- The course consists of preparatory work, lectures, discussion, seminars and hands-on bioinformatics analysis.
- Comprehensive bioinformatics data analysis techniques spanning areas such as transcriptomics, genetics, epigenomics, and single-cell genomics studies among others.
- For doctoral students in medical or biology-related areas, with basic knowledge and skills in general bioinformatics.
- ~30 students in total (~15 from Sweden + ~15 from Japan)
